VISHAL PANT

Khora, Ghaziabad | +91-9354305131 | vishalpahadi4287@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience in PHP, CodeIgniter, Laravel, OpenCart, and MySQL. Skilled in REST APIs, payment gateway integrations, subscription billing, OAuth, WebSockets, and business system integrations. Experienced in building scalable eCommerce, Mobile App, and workflow automation solutions.

PROFESSIONAL EXPERIENCE

Tekshapers Software Solutions, Noida May 2023 – Present

Web Developer

- Designed and developed business-critical **eCommerce** and workflow automation systems using **Laravel, CodeIgniter and OpenCart**.
- Implemented payment gateway integrations and subscription billing systems using **Stripe, PayPal** and **Redsys**, including **recurring payments, webhooks** and **automated billing workflows**.
- Integrated **Zoho Books, Zoho Inventory, and iCarry delivery services**, automating accounting, order processing, and logistics workflows.
- Designed high-performance **REST APIs** with OAuth, rate limiting, batching, and pagination optimization.
- Developed **RBAC, webhook systems, and audit logs** for secure multi-user environments.
- Implemented **multi-channel notifications** (DLT SMS, SMTP email, Firebase push).
- Built **admin dashboards, Excel automation, and mPDF reporting systems**.
- Developed **real-time features (WebSockets)** and automation scripts using Playwright.
- Refactored legacy systems to improve performance, reliability, and maintainability.
- Managed deployments and server configurations using hosting platforms (cPanel), including **cron jobs, domain setup**.

PROJECTS

E-Commerce & Subscription Platform (OpenCart):

Technologies: PHP, OpenCart 3, MySQL, Stripe, Zoho Books, Zoho Inventory, iCarry, Google Translate API

- Developed and maintained a large-scale eCommerce platform with custom checkout flows, subscription billing, and recurring payment management.
- Built custom OpenCart modules, CMS components, invoice generation systems, and Twig-based theme customizations.
- Integrated Stripe, Google Pay, Apple Pay, and payment gateways, including webhook handling and automated billing workflows.
- Implemented synchronization with Zoho Books, Zoho Inventory, and logistics providers for order processing, inventory management, invoicing, returns, and customer lifecycle management.
- Developed custom reporting, stock alerts, expiry alerts, GDPR compliance workflows, audit logs, and scheduled automation using cron jobs.
- Implemented automatic content translation using Google Translation API and developed localization workflows for multilingual storefront management.
- Developed a location-based ranking and analytics platform using Laravel, Node.js, Express, and Playwright to automate Google Maps search result collection and reporting.

Field Data Collection & Water Conservation Platform:

Technologies: Ionic, Angular, Cordova, CodeIgniter 3, MySQL, REST APIs

- Developed and maintained a mobile and backend platform for an NGO focused on water conservation and community outreach programs across multiple regions in India.

- Implemented an offline-first architecture with local data storage, caching, and automatic synchronization when internet connectivity became available.
- Developed and maintained the CodeIgniter 3 backend, designing APIs and workflows to support more than 100 interconnected data collection forms and hierarchical business processes.
- Integrated device capabilities including camera access, file management, network monitoring, permissions, file downloads, and SMS-based authentication using DLT-compliant messaging services.

HRMS & Client Collaboration Platform:

Technologies: PHP, CodeIgniter, MySQL, REST APIs, WebSockets

- Developed modules for client collaboration including message boards, file management, task tracking, notifications, and communication workflows.
- Implemented real-time communication features using WebSockets and developed APIs supporting web and mobile integrations.
- Designed Full & Final (FNF) clearance workflows supporting both parallel and sequential approval processes across departments including HR, IT, and Reporting Managers.

SKILLS

Technical Skills:

- Backend Technologies: PHP, CodeIgniter 3/4, Laravel, OpenCart 3/4, REST APIs, OAuth, Webhooks, WebSockets
- Databases: MySQL, Query Optimization, Indexing, Database Design
- Payment Systems: Stripe, PayPal, Redsys, Subscription Billing, Recurring Payments
- Third-Party Integrations: Zoho Books, Zoho Inventory, Google OAuth, Google Maps API, Google Translation API, iCarry
- Notifications & Communication: Firebase Push Notifications, SMTP Email, DLT SMS
- Tools & DevOps: Git, SVN, Postman, Playwright, cPanel, Cron Jobs

Non-Technical Skills:

- Problem-solving, Analytical Thinking, Collaboration, Attention to detail, Time management.

EDUCATION

IGNOU, New Delhi 2023 - 2025
Masters of Computer Application
